Author index of volume 52

(The issue number is given in front of the page number)

Aharon, G., *see* **Golenko-Ginzburg, D.** (5–6) 381–398
Amato, U. and **I. De Feis,** Smoothing data with correlated noise via Fourier transform (3–4) 175–196
Can, E., *see* **Fatullayev, A.** (2) 113–120
Chen, Y.M. and **H.C. Huang,** Fuzzy logic approach to multisensor data association (5–6) 399–412
Clermont, J.-R., *see* **Normandin, M.** (1) 21–39
Copetti, M.I.M. Numerical experiments of phase separation in ternary mixtures (1) 41–51
Craddock, R., *see* **Dimopoulos, K.P.** (2) 137–162
Cui, X., *see* **Liu, P.** (3–4) 231–250
De Feis, I., *see* **Amato, U.** (3–4) 175–196
Delay, F. and **J.-L. Lamotte,** Numerical simulations of geological reservoirs: improving their conditioning through the use of entropy (3–4) 311–331
Diamond, P., *see* **Vladimirov, I.** (3–4) 251–272
Dimopoulos, K.P., C. Kambhampati and **R. Craddock,** Efficient recurrent neural network training incorporating a priori knowledge (2) 137–162
Efremova, S.S., *see* **Pykh, Yu.A.** (2) 87–112
Falster, P., *see* **Franksen, O.I.** (1) 1–9
Fatullayev, A. and **E. Can,** Numerical procedure for identification of water capacity of porous media (2) 113–120
Franksen, O.I. and **P. Falster,** Colligation or the logical inference of interconnection (1) 1–9
Garcia, S. Incremental unknowns for solving the incompressible Navier–Stokes equations (5–6) 445–489
Gassmann, F., *see* **Graber, W.K.** (5–6) 413–426
Geiger, G., *see* **Matko, D.** (3–4) 211–230
Golenko-Ginzburg, D., G. Aharon and **S. Shimon,** Two-level cost-optimization production control model under random disturbances (5–6) 381–398
Graber, W.K. and **F. Gassmann,** Real time modelling as an emergency decision support system for accidental release of air pollutants (5–6) 413–426
Gregoritza, W., *see* **Matko, D.** (3–4) 211–230
He, H., *see* **Melnik, R.V.N.** (3–4) 273–287
Hsiao, C.-H. and **W.-J. Wang,** State analysis of time-varying singular bilinear systems via Haar wavelets (1) 11–20
Huang, H.C., *see* **Chen, Y.M.** (5–6) 399–412
Jaulin, L., E. Walter, O. Lévêque and **D. Meizel,** Set inversion for χ-algorithms, with application to guaranteed robot localization (3–4) 197–210

PII: S0378-4754(00)00197-X

Juncu, G. and **C. Popa,** Numerical experiments with preconditioning by gram matrix approximation for non-linear elliptic equations (1) 53–71
Kambhampati, C., *see* **Dimopoulos, K.P.** (2) 137–162
Krutitskii, P.A. Acoustic scattering by several obstacles and screens with Neumann boundary condition (5–6) 345–360
Kuo, C.-F.J. and **S.-C. Lin,** Discretization and computer simulation of a rotating Euler–Bernoulli beam (2) 121–135
Kuznetsov, N., *see* **Vladimirov, I.** (3–4) 251–272
Lamotte, J.-L., *see* **Delay, F.** (3–4) 311–331
Lévêque, O., *see* **Jaulin, L.** (3–4) 197–210
Lin, S.-C., *see* **Kuo, C.-F.J.** (2) 121–135
Liu, P. and **X. Cui,** Hyperbolic logistic difference equation with infinitely many delays (3–4) 231–250
Mackevičius, V. A note on synchronization of diffusion (5–6) 491–495
Mahmoud, A., *see* **Normandin, M.** (1) 21–39
Matko, D., G. Geiger and **W. Gregoritza,** Pipeline simulation techniques (3–4) 211–230
Meizel, D., *see* **Jaulin, L.** (3–4) 197–210
Melnik, R.V.N. and **H. He,** Quasi-hydrodynamic modelling and computer simulation of coupled thermo-electrical processes in semiconductors (3–4) 273–287
Normandin, M., J.-R. Clermont and **A. Mahmoud,** Laminar flow calculations in ducts of complex shapes using mapping functions and decomposition of domains (1) 21–39
Page, B., *see* **Reick, C.H.** (3–4) 289–310
Pham, J.N.Q. A unilateral shift setting for the fast wavelet transform (5–6) 361–379
Popa, C., *see* **Juncu, G.** (1) 53–71
Pykh, Yu.A. and **S.S. Efremova,** Equilibrium, stability and chaotic behavior in Leslie matrix models with different density-dependent birth and survival rates (2) 87–112
Reick, C.H. and **B. Page,** Time series prediction by multivariate next neighbor methods with application to zooplankton forecasts (3–4) 289–310
Shimon, S., *see* **Golenko-Ginzburg, D.** (5–6) 381–398
Vladimirov, I., N. Kuznetsov and **P. Diamond,** Frequency measurability, algebras of quasiperiodic sets and spatial discretizations of smooth dynamical systems (3–4) 251–272
Walter, E., *see* **Jaulin, L.** (3–4) 197–210
Wang, W.-J., *see* **Hsiao, C.-H.** (1) 11–20
Yu, J.-Y. A general circulation model of the atmosphere using the full-Galerkin method (5–6) 427–443
